

Corporate Governance Report

The Basler Group is a global organization with an international shareholder structure. The management board and the supervisory board attach particular emphasis on responsible and transparent management and a control of the company that is oriented to sustainable value increase. A meaningful and transparent company communication, the respect for shareholders' interest, a forward-looking approach to changes and risks, as well as an efficient and responsible cooperation between the management board and the supervisory board are major aspects of good corporate governance. The latter promotes the trust of the shareholders, business partners, employees, and finally of the society within the Basler Group. At the same time, these principles are important orientation standards for managing and controlling the group.

The corporate governance report pursuant to § 289f and § 315d HGB (German Commercial Code) is part of the combined management report. Pursuant to § 317 (2) sentence 6 HGB, the auditor's examination of the disclosures pursuant to § 289f and § 315d HGB is to be limited to whether the disclosures have been made. As part of the corporate governance report, the management board and supervisory board also report on the corporate governance of the company.

Declaration of Conformity with the German Corporate Governance Code

“The management board and the supervisory board of Basler AG declare after due examination that in the elapsed fiscal year 2021, Basler AG complied with the recommendations of the German Corporate Governance Code 2020 pursuant to the version of December 16, 2019 (hereinafter called “code”) with the following exceptions:

B. Composition of the Management Board

B.3

Mr. Alexander Temme was appointed to the management board as of January 1, 2021 – initially for four years until December 31, 2024. By this, the company ensures the contracts of the members of the management board to expire with a time lag so that at no time two personnel decisions have to be taken at the same time. In view of Mr. Temme's moving up to the management board after a long time management position in the company associated with a great relationship of trust, the supervisory board considers this decision to be sound.

C. Composition of the Supervisory Board

C.1, C.2 and C.7

In its proposals to the general meeting, the supervisory board will continue to observe legal requirements and give priority to women in case of equal qualification. In doing so, the company's international activities, potential conflicts of interest as well as diversity will be considered. The decision on the candidates which the supervisory board considers to be the most appropriate ones, is to be taken whenever a new election is scheduled. The supervisory board and the management board do not consider it as useful to be bound to pre-formulated abstract targets for selecting candidates instead of freely deciding on a person which is available and seems to be most suitable for the position. Therefore, the supervisory board does not give concrete targets according to point C.1 DCGK (Deutscher Corporate Governance Kodex, German Corporate Governance Code) nor does it set an age limit for members of the supervisory board according to point C.2 DCGK. Subsequently, such targets will neither be taken into account for proposals to the responsible electoral bodies nor will be reported regarding their state of implementation.

G. Remuneration of the Management Board and the Supervisory Board

G.1

The remuneration system of Basler AG provides for financial performance criteria for the granting of variable remuneration components. Non-financial performance criteria are used in corporate management, but they are not used as a basis for determining the variable remuneration components

G.6, G7, G.10

The remuneration system of the management board is based on a „bonus bank system“ which is set up as follows:

The total target achievement (-100 % to 400 %) is multiplied by a defined variable component of the target salary (25 % of the agreed target salary) and results in the amount in Euro for the bonus entitlement of the respective member of the management board for the elapsed fiscal year. Accordingly, the bonus entitlement can amount from -25 % (malus) to +75 % of the target salary.

The bonus entitlement calculated in that way is not paid immediately. In order to satisfy the required long-term and multi-year assessment basis, the bonus amounts are paid out on a delayed basis by a bonus bank and are subject to the interim risk of a substantial reduction

due to a subsequent deterioration in performance. A separate account is kept for the bonus claims of each member of the management board.

The bonus or malus calculated for the elapsed fiscal year is booked to the individual account. Allowing for the previous balance this results in a current account balance. If this account balance is positive one third will be paid out. Two thirds will be forwarded to a new account and be considered in the next year. Negative balances must be compensated by positive balances or bonus deposits before payouts can be made by the bonus bank.

In order to create a special performance incentive for the management board and to motivate its members to work in the long run on increasing the value of the company, the supervisory board decided to convert a part of the bonus into shares. Since 2018, an individually fixed percentage part of the respective future claim for variable remuneration of above 100 % of target achievement will be granted in shares. In this case, the above described bonus bank procedure will also come into effect.

The total remuneration consists of the fixed salary (75 % of the target salary) and the payment made by the bonus bank.

If the targets agreed upon concerning profitability and growth are achieved on average over several years, the actual total remuneration will be in the amount of the target salary. If the targets are clearly missed for a long time, only the fixed salary will be paid out (75 % of the target salary) in the long term.

In case of significant overachievement of the profitability and the growth target over several years a gradually increasing total remuneration of a maximum of 175 % of the target salary will be paid out.

The supervisory board considers the remuneration system appropriate and long-term oriented. It also prevents conflicts of interest and misaligned incentives in the best possible way. A detailed description of the remuneration system can be found in the management report under point 10. In many aspects it is oriented at the DCGK (Deutscher Corporate Governance Kodex, German Corporate Governance Code), however, it slightly deviates from the recommendations of the Corporate Governance Code in points G.6, G.7, and G.10:

G.6 and G.7

This recommendation is deliberately not complied with. Instead, a profound strategy process is conducted every year in which the supervisory board and the management board agree upon the medium and long-term company targets and derive hereof the short-term oriented targets for the variable remuneration.

G.10

The company considers a ratio of 50% of the over-performance amount as a payout in shares to be appropriate. The transfer to the bonus bank as well as the payout are conducted analogously to the process for the variable remuneration in money. One third of the resulting annual balance is paid out and two thirds are carried forward.

Company Website

The declaration of conformity pursuant to §161 of the German Stock Corporation Act (AktG) is available on the internet at

www.baslerweb.com/Investoren/corporate-governance

The declarations of conformity and the corporate governance reports for previous years can also be viewed there.

Relevant disclosures regarding corporate governance practices exceeding legal requirements and where they are made available to the public

The Basler Group is to be perceived as a responsible globally acting company with high ethical and legal standards.

The joint basis for acting is the specific culture of the Basler Group. It is reflected in the fair and respectful treatment of colleagues towards each other and towards third parties and is further characterized by the willingness to perform, open communication, trustworthiness and the conservation of natural resources.

These principles are summarized in the “Code of Conduct” as well as in the sustainability strategy of the Basler Group. This code of conduct is binding for all employees regardless of their function or position within the group. A constant reflection of these values and their incorporation into our daily activities represents a clear commitment to the company's culture and ensures its long-term business success. The “Code of Conduct” can be found on the company's website

www.baslerweb.com/Investoren/Nachhaltigkeit

Further information about this subject can be found in the non-financial declaration in chapter 10.

Further information on corporate management is provided in the group management report under 1.2 Management System.

Compliance as well as Opportunities and Risks Report

The principles of a responsible corporate governance include a continuous and responsible balancing of opportunities and risks. The aim of an opportunities and risks management is to develop a strategy and set up targets that create an even balance between growth and profitability targets on the one hand and the risks linked herewith on the other hand. Details of the opportunities and risks management system of the Basler Group can be found in the group management report <<5. Opportunities and Risks Report.

Compliance

The compliance of business activities with all relevant laws and standards as well as within the company's internal principles is a basic prerequisite for sustainable successful business. Thus, the Basler Group's success is not only based on good business politics, but also on an economically ethical integrity, trust and the open and fair treatment of employees, customers, business partners, shareholders and other stakeholders.

Compliance-Culture and Targets

Compliance has always been a major part in risk prevention and company culture of the Basler Group. The aim is to always act in compliance with all relevant laws, norms, international standards and internal guidelines. The Basler Group pursues a preventive compliance approach and strives for a corporate culture that raises awareness and educates the employees in order to prevent potential violation of the rules. By doing so, the management board and the managers bear a special responsibility. Within their area of responsibility, they are role models and urged to ensure observation of the compliance requirements, to clearly communicate the expectations to each employee and to consistently set an example of compliant and ethical behavior.

Compliance-Organization

The compliance activities are closely linked with the risk management and the internal control system. The legal department controls the compliance activities within the group by creating appropriate structures and processes as well as by giving support for an efficient implementation of compliance measures. In addition, the legal department is available as a contact for individual questions from the organization.

Compliance-Program and Communication

The compliance structures and measures to ensure the observation of laws, guidelines, and ethical principles are consequently aligned to the risk situation of the group and continuously developed further. The compliance activities' starting point for all employees is the binding code of conduct of the group. In addition to the company's website, employees can access the code of conduct and further company guidelines via the group's intranet platform.

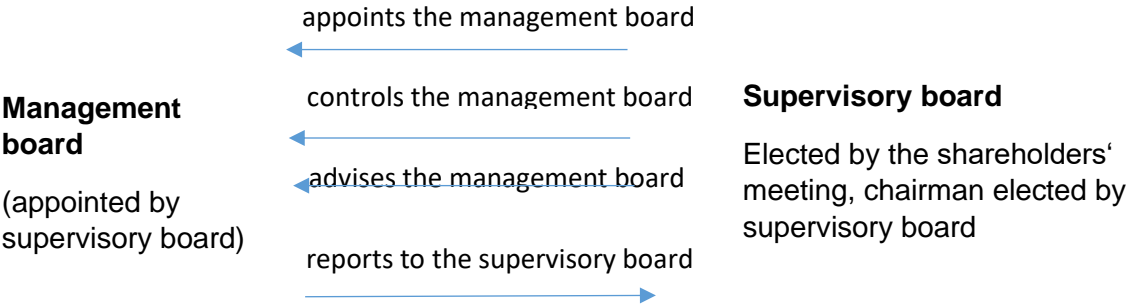

Compliance-Reporting Channels, Reviews and Further Development

Reliable reporting channels and the protection of internal whistleblowers from sanctions are major elements for the identification of compliance risks.

In addition to direct contact with their supervisors, employees of the Basler Group can also report possible violations of laws or policies via a whistleblowing system set up for this purpose without disclosing their identity. All reported clues and violations are timely investigated and evaluated; if necessary, appropriate measures and sanctions are taken. The observation of internal guidelines and legal requirements are regularly subject to internal audits by the corporate audit department. The management board and the supervisory board are regularly informed about facts relevant for compliance as well as about the expansion of the compliance structures and planned compliance measures.

Description of Method of Work of Management Board and Supervisory Board

Basler AG is a German stock corporation acting in line with the dual management and control structure of the two organs: management board and supervisory board.

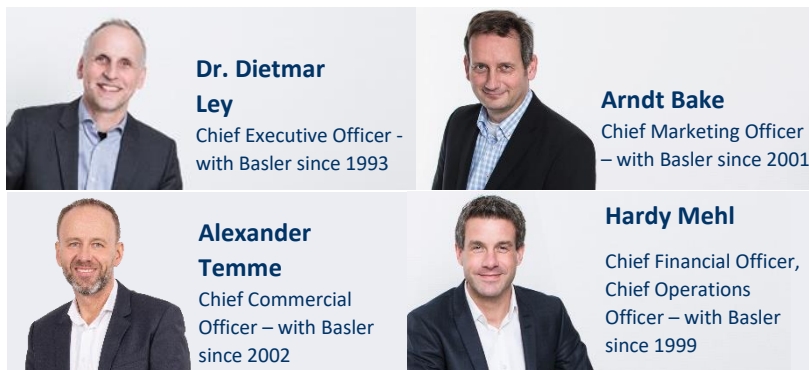

Management Board

Composition

Pursuant to § 7 of the Articles of Association the management board consists of at least two members. The members of the management board are appointed by the supervisory board.

Together with the management board it ensures long-term succession planning. The age limit for management board members is 70 years. A minimum age does not exist.

The members of the management board do not hold any other mandates in other statutory supervisory boards or comparable domestic or foreign supervisory bodies.

Method of Work

The supervisory board has issued rules of procedure for the management board that govern both the cooperation within the management board and the cooperation between the management board and the supervisory board. In line with the interests of the company, the management board performs its management duties aiming for a sustainable increase of the value of the company.

The management board bears overall responsibility for the management of the Basler Group. The management board decides jointly on all matters that are of particular importance and scope for the company or its subsidiaries. The management board is responsible for the preparation of the quarterly statements, the half-year financial report as well as for the preparation of the annual and consolidated financial statements and the combined management report of the Basler Group. The management board reports to the supervisory board regularly, promptly and comprehensively in written and verbal form on all relevant issues relating to business development, corporate planning, strategic alignment, opportunity and risk management, and compliance.

The supervisory board is involved in a timely manner in all decisions that may have a significant impact on the net assets, financial position and results of operations of the company and is kept fully informed by the management board. In the case of acquisition projects, the management board provides detailed information on the progress and status of the project at an early stage and coordinates the acquisition and integration process closely with the supervisory board.

SUPERVISORY BOARD

Composition

Compared to the previous year, the personnel composition of the supervisory board has remained unchanged in fiscal year 2021. The supervisory board consists of the following six members:

Norbert Basler, Chairman of the supervisory board

Prof. Dr. Eckart Kottkamp, Vice chairman of the supervisory board

Horst W. Garbrecht, Member of the supervisory board

Prof. Dr. Mirja Steinkamp, Member of the supervisory board

Dorothea Brandes, Employees' representative in the supervisory board

Marco Grimm, Employees' representative in the supervisory board

The members of the supervisory board are elected by the annual general meeting or by the employees. The chairman of the supervisory board is elected by the supervisory board from among its members. He coordinates the work of the supervisory board and represents the interests of the supervisory board externally.

Information on other mandates held by members of the supervisory board can be found in the notes to the consolidated financial statements. The compensation of the members of the supervisory board is commented on in the group's remuneration report. From May 13, 2022, on, this report is open to the public and subject to approval by the annual general meeting on May 23, 2022.

General Requirements / Competence Profile

In line with the German Corporate Governance Code, the supervisory board agreed upon concrete targets for its composition and resolved on a competence profile for the entire organ of the supervisory board of the Basler Group. Accordingly, each member of the supervisory board must fulfill the legal and statutory requirements for membership of the supervisory board (cf. sect. 100 (1) to (4) AktG). Each member of the supervisory board must have the knowledge and skills required to properly perform the duties incumbent upon him or her by law and under the Articles of Association. The members of the supervisory board as a whole must be familiar with the sector in which the company operates (cf. sect. 100 (5) AktG). Each member of the supervisory board must be sufficiently available and willing to devote the

necessary time and attention to the office. In addition to these general requirements, the entire body should meet the following requirements in particular:

Each member should have a general understanding of the Basler Group's business, in particular the global market environment, individual business areas, customer needs, the regions in which the company operates and the strategic alignment of the company.

1. At least one member should have expertise in the fields of accounting or auditing.
2. One or more members should particularly fulfill the criterion of international exposure or have acquired operational experience in internationally active companies.
3. One or more members should have expertise in the field of business administration.
4. The full board should include one or more members with experience in governance, compliance and risk management.
5. All members should have operational experience in personnel management.

The supervisory board of the company currently considers the aforementioned objectives for the composition of the supervisory board to have been met.

The proposals to the annual general meeting for the election of supervisory board members are based on the competence profile of the supervisory board and the objectives for the composition of the entire body. Against this background, the supervisory board has not currently set an age limit for supervisory board members.

The length of service of the individual supervisory board members can be viewed on the following website:

<https://www.baslerweb.com/de/unternehmen/management/aufsichtsrat/>

The individual supervisory board mandates of the members of the supervisory board as well as their shareholdings and those of the members of the management board are shown in the Notes to the Annual Report.

Independence of Members of the Supervisory Board

The shareholder representatives in the supervisory board have determined what they consider to be an appropriate number of independent shareholder representatives in the supervisory board, taking into account the ownership structure of the company. The supervisory board in its current composition complies with this determination. The number and names of the shareholder representatives are shown in the table below:

<https://www.baslerweb.com/de/unternehmen/investoren/corporate-governance/aufsichtsrat/>.

The supervisory board essentially bases its assessments of independence on the indicators mentioned in the current version of the Corporate Governance Code dated December 16, 2019. More detailed explanations are required for:

The classification of the chairman of the supervisory board Norbert Basler as "independent" of the company and its management board. Norbert Basler is considered independent by the other shareholder representatives on the supervisory board despite his twenty-one-year membership of the company's supervisory board and his (indirect) shareholder position. In his activities as a member of the supervisory board, he has never given cause to doubt that he always performed his duties on the supervisory board in a dutiful and proper manner. The other shareholder representatives on the supervisory board are therefore convinced of his independence. There were and are no significant business relationships between Norbert Basler and the company or any of its dependent companies. Neither is Norbert Basler a close family member of a member of the Basler AG's management board.

The classification of the member of the supervisory board Prof. Dr. Eckart Kottkamp as "independent" of the company and its management board. Prof. Dr. Eckart Kottkamp is considered independent by the other shareholder representatives on the supervisory board despite his more than fifteen-year membership of the company's supervisory board. In his activities as a member of the supervisory board, he has never given cause to doubt that he always performed his duties on the supervisory board in a dutiful and proper manner. The other shareholder representatives on the supervisory board are therefore convinced of his independence. There were and are no significant business relationships between Prof. Dr. Eckart Kottkamp and the company or any of its dependent companies. Neither is Prof. Dr. Eckart Kottkamp a close family member of a member of the Basler AG's management board.

Working Method

The supervisory board assists the management board in an advisory capacity, monitors the management board in its management of the company, and reviews all significant business transactions by inspecting the relevant documents on the basis of the German Stock Corporation Act, the company's Articles of Association, and the rules of procedure for the supervisory board and management board. The supervisory board is also informed by the management board about business developments outside the regular supervisory board meetings. In this way, it can accompany the operating business with advice and recommendations on an appropriate basis.

The supervisory board supplements the management board's rules of procedures by determining a catalogue of transactions requiring consent. The supervisory board acts on the basis of own rules of procedures shown under www.baslerweb.com/CorporateGovernance. Furthermore, the supervisory board adopts the annual financial statements and approves the

consolidated financial statements. Each year, the chairman of the supervisory board explains the activities of the supervisory board in his report to the shareholders as part of the annual report. He is also available to answer questions at the annual general meeting. Additional information on the management board and supervisory board, in particular on their working methods and the mandates held by their members, can be found in the report of the supervisory board, the notes to the consolidated financial statements and the management report.

Together with the management board, the supervisory board also ensures long-term succession planning. For doing so, the supervisory board regularly exchanges views with the management board. Together, the management board and supervisory board evaluate the suitability of potential successor candidates and discuss how suitable internal candidates can be developed further. The supervisory board also reviews on an ongoing basis whether the composition of the management board continues to be the best possible. To this end, the chairman of the supervisory board discusses with the management board in particular what knowledge, experience and professional and personal competencies should be available on the management board, also with a view to the strategic development of the company, and to what extent the management board is already composed in accordance with these requirements.

Committees of the Supervisory Board

The rules of procedure of the supervisory board provide for the formation of two committees; both committees have been formed and are working in accordance with the contents of the rules of procedure of the supervisory board:

The **audit committee** prepares negotiations and resolutions of the supervisory board regarding the following:

- the accounting system and the effectiveness of the risk management system
- the internal control system and the internal audit system for the required independence of the auditor
- the issuing of the audit mandate to the auditor
- the determination of audit focuses and the fee agreement
- compliance
- assessment of the quality of the audit by the auditor

The chairwoman of the audit committee is independent and has in-depth expertise in the fields of accounting and auditing. She is not a member of the management board of the

company. The chairman of the supervisory board is a member, but not chairman, of the audit committee.

Composition of the Audit Committee:

Prof. Dr. Mirja Steinkamp, Chairwoman of the Audit Committee

Norbert Basler, Member of the Audit Committee

Prof. Dr. Eckart Kottkamp, Member of the Audit Committee

The **Nomination Committee** seeks suitable candidates for the supervisory board, whom it recommends to the supervisory board for its election proposal to the annual general meeting. It is composed exclusively of shareholder representatives.

Composition of the Nomination Committee:

Norbert Basler, Chairman of the Nomination Committee

Horst W. Garbrecht, Member of the Nomination Committee

Prof. Dr. Eckart Kottkamp, Member of the Nomination Committee

Self-assessment of the Supervisory Board work

The supervisory board regularly assesses the effectiveness of the performance of its duties as entire body and in its committees. The assessment is based on a catalogue of criteria developed by the supervisory board.

Remuneration of the Management Board and the Supervisory Board

In accordance with the recommendations of the German Governance Code, Basler has been reporting the remuneration of all members of the management board and supervisory board on an individualized basis for some time. The remuneration of the management board includes various components. On the basis of the contracts concluded with them, the members of the management board are entitled to a fixed and an annual variable remuneration as well as fringe benefits. Part of the variable remuneration is paid in shares. The structure of the remuneration system for the management board and the appropriateness of the remuneration are regularly reviewed and determined by the supervisory board.

In line with customary market practice, the company grants all members of the management board additional benefits fixed in their management board contracts, some of which are regarded as non-cash benefits and taxed accordingly, in particular the use of a company car and the granting of accidental insurance coverage. As a rule, sideline activities are subject to approval.

The terms of the contracts of the members of the management board are linked to the term of their appointment to the management board. The contracts of the management board members provide for a post-contractual non-competition clause. The members of the management board are contractually prohibited from providing services to or for a competitor for a period of one and a half years after leaving the company.

Basler AG commissioned a study on the remuneration of the management board and supervisory board in fiscal year 2021. This confirms the appropriateness of the system and the level of compensation and names comparable companies. The benchmark companies were domestic technology companies listed in the Prime Standard with sales of between € 100 million and € 200 million. The study also provided suggestions for the further development of the remuneration system.

According to the recommendations of the German Corporate Governance Code, the members of the supervisory board receive a fixed remuneration.

The remuneration report 2021 for the management board and the supervisory board, the applicable remuneration system pursuant to § 87 a Sec 1 and 2, sent. 2 Aktiengesetz (Stock Corporation Act) as well as the auditor's report pursuant to § 162 Aktiengesetz (Stock Corporation Act) are open to the public with reservation from May 13, 2022 on until approval of the annual general meeting on May 23, 2022, under [www.baslerweb.com/Investoren/Corporate Governance](http://www.baslerweb.com/Investoren/Corporate%20Governance)

In line with the legal changes introduced by the Act Implementing the Second Shareholders' Rights Directive (ARUG II), which came into force on January 1, 2020, the supervisory board has further developed the existing management board remuneration system. The further developed system also essentially complies with the recommendations of the German Corporate Governance Code (GCGC) in the version dated December 16, 2019. Pursuant to § 113, paragraph 3 Aktiengesetz (Stock Corporation Act) the remuneration system was approved by a resolution of the annual general meeting on May 19, 2021. The draft resolution can be found in the invitation to the annual general meeting 2021 and is open to the public under www.baslerweb.com/Investoren/Hauptversammlung/2021 together with the voting results.

Target Figures for Proportions of Women, §§76 para. 4, 111 para. 5 Aktiengesetz (Stock Corporation Act) and Diversity Concept

Pursuant to § 111 paragraph 5 Stock Corporation Act, the supervisory board shall set targets for the proportion of women in the supervisory board and the management board.

There have been no formulated written diversity concepts for the supervisory board as well as for the management board to date. The management board consists of experienced

managers. Before their board activities, all of them were responsible for different areas in the company. Their professional backgrounds and focus complement each other very well. Their individual curricula vitae can be found at

<https://www.baslerweb.com/de/unternehmen/management/vorstand/>

In its meeting in March 2018, the supervisory board decided that for the time being, an increase of the female quota in the supervisory board and the management board is desirable but does not have to be achieved. Currently, no position in the management board is occupied by a woman. The female quota in the supervisory board is 33 %.

In its proposals to the general meeting, the supervisory board will continue to observe legal requirements and give priority to women in case of equal qualification. The decision on the candidates which the supervisory board considers to be the most appropriate ones, is to be taken whenever a new election is scheduled. The supervisory board and the management board do not consider it as useful to be bound to pre-formulated abstract targets for selecting candidates instead of freely deciding on a person which is available and seems to be most suitable for the position.

In January 2022, the supervisory board and the management board decided that a female quota of 30 % of senior executives and 32.5 % of department heads should be achieved or maintained in the group by the end of 2025.

The first level of management beneath the Management Board is the divisional management and below it follows the department management. On December 31, 2021, approximately 28 % of Basler AG's divisional managers and 21 % of its department managers were female.

The targets for promoting the participation of women in management positions have not yet been met at the end of the reporting period. This is due to the M&A transactions of smaller companies which had mostly males in management positions in the past years. The possibilities in the context of organic growth over the short period of time were not sufficient to compensate for this effect. In addition, there were significant new hires in 2021, however, most of them for development. Typically, the number of female applicants in this area is relatively low.

The company offers a special training program (high potential program) in order to qualify talented employees for leadership roles. The 2021 program sequence again focused on the promotion of women in leadership positions. The goal is to identify and promote suitable managers in order to sustainably increase the percentage of women in management positions.

FURTHER DISCLOSURES ON CORPORATE GOVERNANCE

Accounting and Auditing

Basler AG prepares its consolidated financial statements and consolidated interim reports in accordance with the International Financial Reporting Standard (IFRS). Basler AG's annual financial statements (separate financial statements) are prepared in accordance with the provisions of the German Commercial Code (HGB). The consolidated financial statements are prepared by the management board, audited by the auditor and approved by the supervisory board. BDO AG Wirtschaftsprüfungsgesellschaft was elected by the annual general meeting as auditor/consolidated financial statements auditor for the fiscal year 2021. BDO took part in the supervisory board's discussions on the annual financial statements and consolidated financial statements on March 25, 2022, and reported on the results of this audit. In addition, the auditors were available to the supervisory board to provide additional information and answer questions on the audit.

Transparency and Communication

Basler attaches great importance to open and trusting communication with shareholders and other stakeholders and maintains a fair, timely and reliable dialog. All information relevant to the capital market is published simultaneously in German and English and made available on the Company's website. This includes annual and quarterly reports, corporate news and insider information, information on the Annual General Meeting and company presentations. The financial calendar with the relevant publication and event dates can also be found there.

Shareholders and Annual General Meeting

At the annual general meeting, shareholders can exercise their rights and cast their votes. The management board presents the consolidated and annual financial statements, explains the company's prospects and, together with the supervisory board, answers shareholders' questions. In accordance with the provisions of stock corporation law, the invitation to the annual general meeting and the associated documents and information will be made available on the website of Basler AG or displayed for inspection at the company's offices on the day the meeting is convened. In exercising voting rights, Basler supports its shareholders by appointing proxies who vote in accordance with the shareholders' instructions.

Directors' Dealings, Voting Rights and Stock Option Plan

Basler AG provides information on trading in shares of the company by members of the management board and supervisory board (directors' dealings) in accordance with Art. 19 MAR, as well as on reported changes in shareholdings if the voting rights thresholds defined in the German Securities Trading Act are reached, exceeded or fallen below. Information on

the shareholdings of the management board and the supervisory board can be found in the notes. The Basler Group currently has no stock option plan.
