Overview of the first six months of 2024:

- ▶ Incoming orders: € 92.5 million (previous year: € 94.0 million, -2 %)
- ▶ Sales: € 93.0 million (previous year: € 116.1 million, -20%)
- ▶ EBITDA: € 7.1 million (previous year: € 10.7 million, -34 %)
- ▶ EBT: € -2.3 million (previous year: € 0.2 million >-100 %)
- ▶ Net result: € -3.4 million (previous year: € -1.7 million -100 %)
- ▶ Free cash flow: € -2.1 million (previous year: € -9.6 million, 78 %)

Dear Shareholders,

Following the restructuring in the second half of last year, we had an intensive first half of 2024 in which we focused more strongly on the future in order to return to a profitable growth path as quickly as possible and to drive forward our transformation into a full-range solutions provider. The team worked with a high level of commitment and gradually settled into the new structures. In the second quarter, we again saw a significant increase in incoming orders, although they are still at a relatively low level. The increase in incoming orders and sales as well as further progress in the gross profit margin resulted in a positive pre-tax result in the second quarter. However, continued market weakness, above average inventory levels at our customers and geopolitical uncertainties prevented us from achieving a profit in the first half despite a significantly reduced cost base. We remain committed to our course of strict cost discipline and are optimistic that market conditions will gradually improve as the year progresses and that we will continue to move towards profitability.

As part of our strategic development, we acquired a 25.1 % stake in Roboception GmbH in Munich. With its innovative hardware and software products, Roboception is a pioneer in the field of intelligent 3D image processing sensors for robotics. We are pleased that this investment will intensify our existing sales cooperation that has been in place since 2021 and are convinced that Roboception's 3D vision solutions will make a decisive contribution to the further development of intelligent robotic systems and expand our product portfolio in an attractive way. In addition, we increased

our stake in Basler France to 100 % as planned after the end of the reporting period, effective August 1, 2024, thus consistently supporting our strategic path towards a more direct market presence in key national markets.

With this compact six-month report we would like to give you a deeper insight into the development of the first half of the year.

Your management board

Business Development

In the first six months of the year, incoming orders amounted to € 92.5 million (previous year: € 94.0 million). Incoming orders grew sequentially for the third quarter in a row and showed a sustained positive trend. Sales decreased by 20 % to € 93.0 million (previous year: € 116.1 million) compared to the same period of the previous year, in which an increased order backlog due to the chip crisis was reduced. The main reason for the low level of incoming orders and sales was the continued weak demand from the equipment industries for consumer electronics, logistics and laboratory automation in Asia and North America. Increased inventories at customers as a result of over-ordering during the chip crisis further dampened the already low demand. High interest rates and geopolitical tensions prevented the business climate in the capital goods markets from brightening towards the end of the reporting period.

The German Engineering Federation (VDMA) reports a nominal decline in sales of 19 % compared to the previous year for German manufacturers of machine vision components as at the end of June 2024. Incoming orders in the industry fell by 7 % in the same period.

Basler's sales development showed a high correlation with the industry in the first half of the year. Incoming orders developed better. This is particularly due to the higher share of Basler's business in the early-cycle regions of Asia and the Americas, which already showed a significant decline in the first half of 2023.

In this weak market environment, the Basler Group performed in line with the forecast, but despite the significant reduction in the cost base and the increase in the gross margin, it fell just short of the pre-tax profit threshold and reported a pre-tax loss of € 2.3 million for the first half of the year.

Product Development & Product Launches

In the first six months of 2024, development activities were ongoing in many future-oriented projects. The full costs of development services amounted to € 14.4 million in the first half of the year (June 30, 2023: € 20.4 million). Absolute R&D costs were significantly reduced as part of the restructuring, but at 15 % in the first half were still above the target ratio of around 13 % due to the low level of sales. This is being temporarily accepted in order to best support the transformation to a full-range solutions provider in terms of technology and products.

With the imaFlex CXP-12 Quad, Basler AG expanded its CXP-12 Vision portfolio in the second quarter by a powerful, individually programmable frame grabber. With the help of the graphical FPGA development environment VisualApplets, application-specific image processing for high-end applications can be implemented directly on the frame grabber. The Basler boost cameras, trigger boards and cables together with the card form a complete, compatible CXP-12 Vision portfolio.

The ace 2 X visSWIR camera family was expanded by four high-resolution models. The models - with a choice of USB 3.0 or GigE interface - are equipped with Sony's latest SenSWIR sensors IMX992 and IMX993 with 5 MP and 3 MP resolution. They complement the existing IMX990 (1.3 MP) and IMX991 (VGA) models. Thanks to firmware features, all SWIR cameras deliver high image quality in the visible and shortwave infrared spectrum from 0.4 µm to 1.7 µm. With a 29 mm x 29 mm size, they are compact and cost-effective, making them suitable for applications where conventional SWIR cameras are too large or too expensive. Typical applications for this technology include the food and semiconductor industries.

The 3D imaging processing product line was also expanded and supplemented by the industrial-grade Basler stereo visard camera series. Robots equipped with Basler stereo cameras can perceive their environment in high resolution. The five model variants are available with basic distances of 65 millimeters and 160 millimeters, in both monochrome and color. All cameras come with a pre-installed, modular on-board software package that is suitable for typical robotics applications such as object recognition or „reach into the box“.

Outlook

The restructuring program was largely completed by the end of 2023 and the break-even point was lowered to below € 200 million. These cost reduction measures and the increase in gross profit were already clearly noticeable in the first half of the year. Despite these initial positive trends, the market environment must still be described as weak. As a result, incoming orders and sales were still slightly below break-even in the first half of the year. The management board now expects a noticeable recovery in demand for capital goods to start later than anticipated at the beginning of the year. Therefore, management confirms its forecast, but narrows the forecast corridor to the lower half. Whereas sales of between € 190 - 210 million and a pre-tax margin of 0 - 5% were previously assumed, sales of between € 190 - 200 million and a pre-tax margin of between 0 - 3% are now expected.

Interim Management Report including essential Supplementary Disclosures of the Consolidated Annual Financial Statement of December 31, 2023 according to IFRS

Report on profit, finance, and asset situation

Sales and incoming orders, costs of service provision

Sales decreased by 20 % to € 93.0 million compared to the same period of the previous year (€ 116.1 million). Incoming orders decreased to € 92.5 million (previous year: € 94.0 million), a decrease of 2 % compared to the previous year. Although at a low level, the ratio of incoming orders to sales was balanced during the reporting period. Both sales and incoming orders increased again compared to the previous quarter. Incoming orders increased by 10 % to € 48.5 million compared to the previous quarter, while sales increased by 14 % to € 49.5 million.

Sales and Incoming Orders

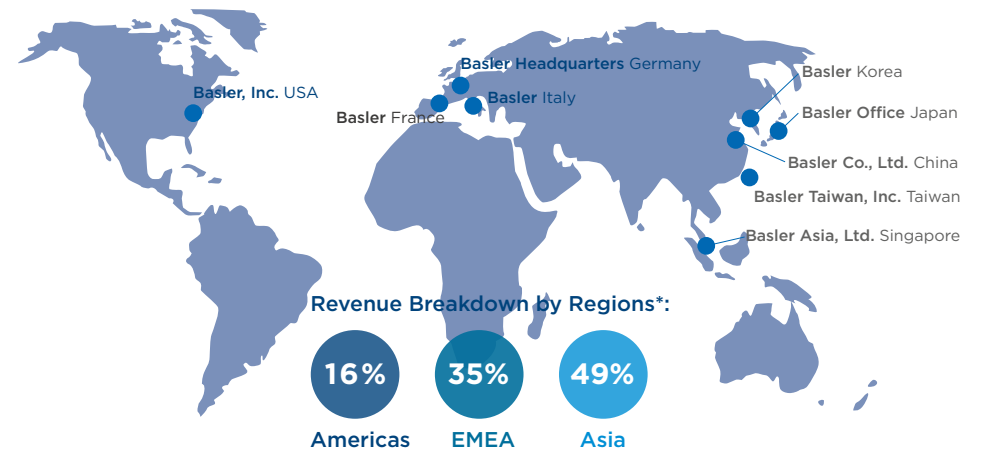

For the last six quarters (in € million)

* order entry in 2023 excluding cancellations of orders placed in previous years; no significant amount of cancellations in 2024

Sales split by Regions

Compared to the first half of last year, the regional distribution of sales has shifted slightly towards Asia - Europe 35 % (previous year: 38 %), America 16 % (previous year: 16 %) and Asia 49% (previous year: 46 %).

*as of June 30, 2024

Gross Profit and Gross Margin

At 46.5 %, the gross profit margin for the first six months of 2024 was slightly above the previous year's level, but well above the level of the second half of 2023. In the second quarter, the gross profit margin increased again to 48.1 %. The measures taken in recent quarters to increase the gross profit margin showed a clear impact in the past two quarters. However, increased material costs due to the chip crisis, weak currencies in China and Japan and low capacity utilization in production continued to have a temporary negative impact on the gross profit margin. Price pressure due to intense competition, particularly in the Chinese market, also continued.

Earnings before Taxes

The increase in sales and gross margin resulted in a positive pre-tax result of € 1.3 million in the second quarter. For the first six months, the pre-tax result was € -2.3 million (previous year: € 0.2 million). The after-tax result for the first six months amounted to € -3.4 million (previous year: € -1.7 million). Earnings per share amounted to € -0.11 (previous year: € -0.06).

Asset Situation

In comparison, noncurrent assets were slightly lower than at December 31, 2023.

Due to weak demand, inventories were only reduced by € 0.2 million in the first six months of the year. Significant reductions in inventories are not expected until later in the financial year, when long-term delivery obligations have fully expired and demand picks up further.

Development of Equity

Due to the result, equity decreased to € 135.5 million in the first half of the year (December 31, 2023: € 139.2 million). The equity ratio was 54.3 % as of June 30, 2024, compared to 54.4 % as of December 31, 2023. The continued high equity ratio provides a solid foundation for financing the upcoming transition year.

Cash Flow and Liquidity

Cash flow from operating activities amounted to € 3.9 million (previous year: € -1.0 million) and is primarily characterized by the accumulated loss due to the low level of business activity.

Cash flow from investing activities amounted to € -6.0 million (previous year: € -8.6 million) and includes the investment in Roboception GmbH. Compared to the previous year, the level was significantly reduced as part of the restructuring program and the ongoing strict cost and investment management.

Cash flow from financing activities amounted to € -6.4 million (previous year: € 16.2 million). The main factors influencing this item in the reporting period were the repayment of bank loans and the repayment of finance lease liabilities.

In total, free cash flow amounted to € -2.1 million (previous year: € -9.6 million). As a result, cash and cash equivalents decreased from € 32.2 million (December 31, 2023) to € 23.8 million. Net debt after deduction of all bank liabilities amounted to € 33.0 million (December 31, 2023: € 29.0 million).

CashFlow

For the last six quarters (in € million)

Events after the end of the interim reporting period

Employees

At the reporting date of June 30, 2024, the Basler group employed 882 employees (December 31, 2023: 942) on a full-time equivalent basis. Compared to the previous year, the number of employees decreased by 235 full-time equivalents (June 30, 2023: 1,117).

Report on Significant transactions with related parties (entities and individuals)

There have been no material related party transactions since the reporting date of December 31, 2023.

Opportunities and Risks Report

Regarding significant opportunities and risks of the probable development of the Basler Group, we refer to the group management report as of December 31, 2023. In the first half of the year, an analysis was made of the risks that have arisen in the area of order intake and business development. The next Group-wide comprehensive risk inventory will take place in the third quarter of 2024.

Notes to the interim statement according to IFRS

The interim statement of Basler was prepared according to the International Financial Reporting Standards (IFRS) as applicable within the European Union (EU), the interpretations of the International Financial Reporting Interpretations Committee (IFRIC), as well as the Standing Interpretations Committee (SIC). The interim statement was

prepared according to the provision of the IAS 34. The interim financial statements as of June 30, 2024 are unaudited and have not been reviewed by an auditor. In principle, the same accounting and valuation methods are applied in the interim financial statements as in the consolidated financial statements as of December 31, 2023.

For significant changes to the consolidated statement of financial position, the consolidated statement of comprehensive income and the consolidated statement of cash flows, please refer to the report on the results of operations, financial position and net assets. The statements on IFRS 9 made in the annual financial statements as of December 31, 2023 have not changed in the first six months of the current financial year. To date, the Basler Group has not been able to identify any changes in the payment behavior of customers that would have led to a different valuation of trade receivables. As of the reporting date, there were no findings that would have led to a revaluation of lease accounting in accordance with IFRS 16.

Basler in the Capital Market

The course of business and the restructuring program, as well as the general mood on the capital markets with regard to small and mid caps, have been clearly reflected in the price of Basler shares in recent quarters. In addition to the resolute management of the restructuring program, the management has again intensified its active exchange with the capital market in recent months through conferences, roadshows and video calls. In the coming quarters, management will continue to report transparently on the market situation and the progress of the transformation to a solution provider.
