#### Dear Ladies and Gentlemen,

In a dynamic market environment, Basler AG had a very strong start in the first three months of 2017. Record values for incoming orders and sales led to a further expansion of the market position and to a considerable order backlog. The high business level led to significant economies of scale and thus to a considerable increase of the pre-tax result.

## **BUSINESS DEVELOPMENT**

For the first quarter of 2017, the VDMA (Verband Deutscher Maschinen- und Anlagenbau, German Engineering Federation) reported a sales growth amounting to +37 % for the German manufacturers of image processing components. According to the VDMA (Verband Deutscher Maschinen- und Anlagenbau, German Engineering Federation) incoming orders in the industry grew by 65 % in the same period.

In comparison to the market, in the first three months of 2017, Basler AG achieved an increase in sales of 62 % and thus considerably gained market shares. The historical increase in incoming orders (+ 157 % compared to the previous year) was unforeseen and developed dynamically, particularly in the month of March. Despite immediate expansions of production capacities this extraordinarily high increase led to a considerable order backlog and to an extension of delivery times.

The very high sales level together with an improved gross margin led to significant economies of scale and to a pre-tax rate of return of 22 %. Despite a strong increase of receivables, the free cash flow accumulated on a level of  $\leq$  1.7 million (previous year:  $\leq$  -1.2 million, > 100 %) in the first quarter.

The very strong increase in incoming orders is particularly due to the following factors. Firstly, to a very high demand in all regions and industries. Secondly, to a very strong investment cycle in the Asian electronic goods industry, and thirdly, to early order placements due to extended delivery times. In the upcoming months, incoming orders are expected to considerably weaken. However, the high order backlog will have positive effects on the sales levels in the months to come.

#### Incoming orders, sales, and gross profit

In the first quarter of 2017, the positive trend of the elapsed fiscal year clearly strengthened. Sales as well as incoming orders in particular significantly increased. In the current fiscal year, first quarter sales amounted to  $\leqslant$  36.3 million (previous year:  $\leqslant$  22.4 million, + 62 %) and incoming orders to  $\leqslant$  60.4 million (previous year:  $\leqslant$  23.5 million, + 157 %). Due to the high utilization, the costs for performance developed slightly disproportionately and thus, the gross margin increased to 49.6 % (previous year: 49.1 %). In absolute terms, compared to the previous year, the gross result increased by  $\leqslant$  7.0 million to  $\leqslant$  18.0 million (previous year:  $\leqslant$  11.0 million).

## **GROSS PROFIT**

Development of Gross Margin (acc. to IFRS and HGB)

#### Expenses, Costs, earnings, and Equity

The personnel and material costs developed more slowly despite provisions made for possible profit sharing. Due to the strong increase of the gross result as well as economies of scale in the personnel and material costs, compared to the previous year's first quarter, the pre-tax result (EBT) increased by  $\in$  5.7 million to  $\in$  7.9 million (Q1 2016:  $\in$  2.2 million). The pre-tax return rate of nearly 22 % was much higher than the long-term goal for the EBT margin of 11 %. The net result amounted to  $\in$  5.7 million (previous year:  $\in$  1.6 million). The result per share increased to  $\in$  1.78 (previous year:  $\in$  0.51, + 249 %).

Since the beginning of the year, equity increased by approximately  $\leqslant$  5.1 million to  $\leqslant$  55.1 million (Dec. 31, 2016.  $\leqslant$  50 million, + 10 %). Furthermore, in the reporting period, own shares in an amount of  $\leqslant$  657 thousand were purchased. As of the end of the reporting period, the number of own shares amounted to 295,434 pieces.

## **CASH FLOW AND LIQUIDITY**

Despite the significant increase in sales and the accompanying higher receivables, the operating cash flow significantly increased and amounted to  $\le$  4.2 million (previous year:  $\le$  0.8 million, +425 %) in the reporting period. The cash flow from investing activities increased by 25 % to  $\le$  -2.5 million (previous year:  $\le$  -2.0 million).

In total, the free cash flow reached a level of  $\leqslant$  1.7 million (previous year:  $\leqslant$  -1.2 million) and covered the cash flow from financing activities amounting to  $\leqslant$  -1.5 million and additionally generated a liquidity increase of  $\leqslant$  0.2 million. Thus, liquid assets increased to  $\leqslant$  19.7 million on the reporting period closing date. The net cash position amounted to  $\leqslant$  9.2 million at the reporting date (Dec. 31, 2016:  $\leqslant$  8.8 million, +5 %).

#### Outlook

So far, fiscal year 2017 has been very dynamic and successful for Basler AG. The growth and planning targets were clearly exceeded and due to the large order volume, Basler AG started with strong tailwind into the second quarter. Already for the upcoming quarter the management expects a weakening and normalization of the incoming orders. However, due to the large order volume, sales will be on a very high level at full capacity in the next months and probably be back to normal in the course of the second half of the year. With a very high priority, the organization is working on the expansion of capacities and reduction of delivery times as well as securing the supply chain. The management is very positive about the coming months of the fiscal year and confirms the forecast published in March according to which the group's sales 2017 will be within a corridor of  $\leqslant$  120 – 130 million at a pre-tax return margin of 13 – 15 %. Based on the positive results and positive outlook we will continue to forge ahead with our growth strategy in the coming months.

On April 21, 2016, the management board and supervisory board of Basler AG adopted a resolution about buying additional own shares. In August 2015, the company ultimately sold non-par bearer shares to the capital market and holds nearly 8 % (295,434 pieces) own shares on March 31, 2017.

The general meeting of June 04, 2014, authorized the company to buy back own shares amounting to a total of up to 10 % of the share capital of the corporation existing at the time the resolution was adopted. The authorization is valid until June 03, 2019. The shares can be used for all purposes provided for in the authorization of the general meeting of June 04, 2014. When acquiring own shares via the stock exchange, the price paid per share (without considering incidental purchase costs) must not differ by more than 10 % from the share price of the company for shares with same conditions as determined on the trading day by the opening auction for XETRA trade on the Frankfurt/Main stock exchange.
