

PCN Number: 01/2020
Title: **Change of DC Iris Connector on Basler IP Fixed Box cameras**
Product Family: Basler IP Fixed Box
Release date: January 23, 2020
Contact: Basler Support
Type of Change:
 Miscellaneous **Firmware** **PC Software**
 Product design **Process** **Hardware**

Reason for Change

The DC Iris Connector used in all Basler IP Fixed Box cameras has been discontinued by our supplier.

To provide continuous availability of our Basler IP Fixed Box cameras we will change the DC Iris Connector to the recommended replacement from the same supplier.

Change Description

The change neither influences the functionality nor the specifications of the camera.

The DC Iris Connector is loosely attached to the housing. It can be slightly pulled out and pushed back in. A small gap between the housing and the DC Iris Connector is possible. This has no influence on the functionality.

There is no risk of completely pulling the DC Iris Connector out, because it has brackets on the inside. The previous DC Iris Connector was less loose but still not completely tight. Therefore the design of the camera is already prepared for this change and it won't cause any problems. The DC Iris Connector is not soldered directly on a PCB, but connected with a cable to handle the flexibility.
